PRODUCT DESCRIPTION

The Billcon N 133 compact bill counter is equipped with ultra violet sensors that easily detect notes created by color copiers. The Billcon N 133 compact bill counter also has magnetic sensors that search for counterfeit components in each bill counted. The bill length detection system measures the banknote to the exact dimensions of a true bill. An instant audible tone works as an alarm to notify the user of fake notes. A flashing light appears on the electronic display to identify more than 10 types of possible detection problems. The Billcon N 133 compact bill counter features include variable speed settings of 50 to 1,000 banknotes per min and the controls may be programmed to automatically recount a preset batch number of notes repeat mode , to automatically stop counting when reaching a preset batch number batch mode , to automatically count the batch of notes and record the running total add mode accumulate function and a default counting function count mode .

PRODUCT FEATURES
