PRODUCT DESCRIPTION

The Astroscan 6545 is designed and developed to be the ideal solution for the screening of small parcels for airport, government and commercial applications. With a tunnel opening of 650mm 25.6 inches wide by 450mm 17.7 inches high , the Model 6545 was specifically designed to allow most parcels and hand carried luggage to be easily examined and the astroscan 6545 uses a high resolution X ray detector array for improved image presentation and increase automatic threat detection. The Astroscan 6545 is ergonomically designed with operator comfort and ease of operation as a main feature of the system. The unit has a detachable control unit that allows the operator to change positions and it increases the functionality of the image and conveyor controls, while reducing fatigue. The astroscan 6545 baggage scanner is a PC based system that can be networked with other inspection systems and can transmit data via ethernet using the TCP IP network protocol system. images from each astroscan 6545 can be sent through a network to a central server PC where the images can be viewed, stored or printed.

PRODUCT FEATURES

PRODUCT SPECIFICATION

Max. Parcel Width	25 in.
Max. Parcel Length	N/A in.
Max. Parcel Height	17.5 in.
Voltage	120-240 volts

DIMENSIONS

Weight:	990.00 lbs.
Width:	32.00 inches
Length:	87.00 inches
Height:	50.00 inches
