PRODUCT DESCRIPTION

The MBM 2401 CC cross cut shredder, with its 32 x 5 8 shred size, is great for offices that want added security. It features clearly arranged symbols and pilot lights for easy operation. An electronic door safety switch will stop the cutting heads as soon as the door is opened. The 2401 CC automatically stops when the shred bag is full or if paper jams. This machine shreds up to 8 sheets of paper at a time. A special feature to this machine is that it comes equipped with a flap for non confidential waste. This means the purchase of a separate garbage receptacle is not required for newspapers and other office waste. The cabinet comes complete with casters enabling it to be rolled from office to office for easy maneuverability.
