PRODUCT DESCRIPTION

For higher production needs, the PJ 100 Paper Jogger will jog a 4 stack of paper in a vertical position or a horizontal position to suit your operating requirements. The V shaped jogger tray allows you to jog a criss cross stacked pile easily. The PJ 100 Paper Jogger is easy to set up and operate. A foot pedal switch starts and stops the jogger so both hands are free. The Standard PJ 100 paper jogger provides relief to difficulties in jogging today's statically charged digital output. The PJ 100 Paper Jogging machiner features air assist to remove static and a cycle down timer to ensure that the printed pages stay jogged when the motor stops.
