PRODUCT DESCRIPTION

The Formax FD 524 decollator is a continuous form 2 part decollator that can separate two part forms in a single pass, and up to 8 parts of non carbon or 8 parts of carbon interleaved forms which may require several passes. Formax FD 524 decollator features include an A frame design that minimizes footprint and is perfect in limited space. Its equipped with a powerful motor that has a variable speed of 0 450 feet per minute and a large station capacity. Optional paper control rods available to aid in the flow of carbonless forms into stations.
