### PRODUCT DESCRIPTION

DFG Perfect Binder DigiPerfect900 Inline Post Binding Finisher The DigiPerfect900 is a fully automatic perfect binder with milling and notching that can bind a book in less than 20 sec. Perfect Binding is a process where a machine uses a hot melt glue to bind the book block to a hard or printed wrap around cover. Perfect Binding is a premium product that has many applications. It is ideal for catalogs, self publishers, workbooks, and much more. Perfect binding has a premium appearance, but is less time consuming and more cost effective than mechanical binding. The DigiPerfect900 is the World's First and Only Inline Post Binding Finisher. After the book is bound, a hingeline creased near the spine of the book which gives relief to spine, thus preserving the strength of the book. Creating a hingeline is essential for binding color and glossy pages. Without a hingeline, pages turn on the spine, reducing the strength of the spine. Hingelines create a weak point for pages to turn on which keeps the binding strong. Pages always turn at the same exact point, thus preserving the color and image on the page at the spine. The DigiPerfect900 is a fully automatic perfect binder with milling and notching that can bind a book in less than 20 sec. Optional hardcover kit available, upgrade for an additional cost. Perfect for Digital Printing Color and Glossy Sheets Pages Turn On Hingelines Keeps Binding Strong Binding from 2 Sheets up to 1 3 4 Inches Optional Hardcover Kit Upgrade at an additional cost NO Operator Training Required User Friendly No set up required for any book size and thickness Push button operation SPECIFICATIONS Machine Cycle ....250 Cycles per hour Book Thickness ....2 Sheets up to 1 3 4 Inches Book Size ....Spine Length of 13 Inches Warm Up Time ....25 Minutes Dimensions L x W x H ....55 x 25 x 40 Inches Weight....364 lbs. Voltage ....110 Volts
