you can export the data to Microsoft Excel or other databases. Ideal for guards and other security personnel, hospital or nursing home staff, cleaning crews and any situation where you need to be able to verify when your personnel have visited specific locations. The advanced ARES Express system offers incident tracking. With ARES Express, your personnel can use a handy optional incident pad to record more information about conditions they encounter while completing their rounds. You can program up to 9,999 incident codes to capture detailed information about the conditions at each station. The ARES software requires an IBM compatible PC with a Pentium III processor or better and at least 512 MB of RAM. Supported operating systems Windows 2000 SP4 , Windows XP and Windows Vista Business or Vista Enterprise. The software can display in either English or Spanish.
