PRODUCT DESCRIPTION

Acroprint timeQplus V3 Software timeQplus V3 Software quick and easy PC punch. With timeQplus V3 software, up to 50 employees can clock in and out at a single designated PC. Add a network upgrade and employees can clock in and out at any networked PCs you choose, including the networked PCs on their own desks. Upgrades are also available to expand system capacity to as many as 250 employees. The timeQplus V software can be configured to work with a wide range of payroll policies and will accommodate both hourly and salaried employees. The timeQplus software accommodates two classes of overtime plus 7th day overtime for weekly, bi weekly, semi monthly or monthly pay periods. You can configure up to 12 shifts, each with their own standard start and stop times and lunch rules. The V3 software records hours worked for overtime eligible employees, and records sick time, vacation, holidays and other absences for salaried exempt employees. There s no longer any need to use different tracking methods for exempt and non exempt hourly employees, all your employees can use timeQplus. You can quickly install the timeQplus software yourself. A helpful user manual and built in software Wizards will guide you through configuring the software to reflect your timekeeping and payroll policies. You can configure the software interface to display in your choice of English, Spanish or French. The timeQplus V3 solution at a glance is Flexible easily manage your business your way. You choose how your employees clock in and out a. PC punch b. Proximity badge terminal c. Finger scan biometric terminal or any combination Economical saves you time and money on payroll preparation. Supervisors can edit and approve the electronic time cards at the PC. The software automatically calculates hours worked

and exports data to most popular payroll software and services including ADP and QuickBooks. This reduces clerical errors while streamlining the payroll process. Expandable This system grows with your business. Start with what you need now, and easily add capacity as your needs change. Add more terminals any time; you can even mix biometric and proximity badge terminals on the same system Software upgrade packs are also available to expand capacity to a total of 250 employees. Choose Your Configuration To make it even easier to get started, timeQplus is available in several standard configurations. You can opt for software upgrades and additional terminals at any time to customize your system to meet your specific needs. timeQplus V3 Proximity Convenient proximity badge punching. Employees clock in and out with a simple wave of their badge in front of the terminal, or via keypad entry. This complete kit includes software for 50 employees expandable up to 250 employees , software network upgrade, 15 proximity badges, and one TQ600P proximity terminal with cables, power supply and mounting hardware. timeQplus V3 Biometric Virtually eliminates costly buddy punching. Employees clock in and out with a simple finger scan, finger scan and PIN or PIN and password. This kit includes everything you need to get started software for 125 employees expandable up to 250 employees , software network upgrade, and one TQ600 biometric terminal with cables, power supply and mounting hardware. Terminal Specifications Please note your system must have a Software Network Upgrade installed before you can install Proximity or Biometric terminals. You can mix and match Proximity and Biometric terminals on a single system. Terminals are available in your choice of English Spanish or English French. Easy to Install, Easy to Use The timeQplus system is an accurate and easy to use record keeping solution ideal for many work environments. This time and attendance solution adapts to the way you do business, not the other way around.
