PRODUCT DESCRIPTION

Ribao CS 10 Coin Counter The Ribao CS 10 is an electronic coin counting and sorting machine. The Ribao CS 10 is light weight, has a handle making it easily transportable and can be folded down into a compact case. The Ribao CS 10 Coin Counter has a keyboard enabling you to program the machine to do batching and accumulating counting. The coins are selected according to their diameter and thickness, and the settings can be changed using two buttons. The coins with smaller diameters can be found during the sort by elimination. The Ribao CS 10 Coin Counting Machine comes with tube sets for quarters, nickels, dimes, and pennies, the coins drop inside the appropriate crimped coin wrap while it is counting. The Ribao CS 10 Coin Counting Machine can be used for tokens and foreign coins by selecting your own thickness and diameter according to their appropriate size. Lightweight, portable unit that folds down into a compact case. Great for Route Sales or Multiple Locations. Ribao s CS 10 coin counter is an economical yet powerful solution to high volume coin counting designed for portable applications. Included 4 Coin Tube Attachments A set of four tube attachments for rolling Quarters, Nickels, Dimes, and Pennies is included. Coins drop inside the matching crimped coin wrap while it is counting. Paper sleeves rolls sold separately. Optional 2 Coin Tube Attachments Tube attachments for Loonies and Toonies is also available. Paper sleeves rolls sold separately. Coin Bag Attachments A set of two bagging attachments with locking rings are included to fit the front and side coin chutes. Coin bags sold separately. Selectable Thickness and Diameter Settings Can be used for tokens and foreign coins by selecting your own thickness and diameter according to your token and coins. The coins are selected according to their diameter and thickness, and the settings can be changed

Frequently Asked Questions FAQ Do the coins need to be sorted before counting The CS 10 is primarily a counter, and does not sort; however, you can still conduct waterfall or off sort sorting.

Step 1 The method would be to set program the CS 10 to count the largest coin, quarters, for instance. Step 2 You load a batch of mixed coins into the CS 10 which then counts the quarters while depositing the quarters into the bank bag. All the other coins land in the off sort side tray or bag. Step 3 Replace the quarter bag with the next size down e.g. nickel . Step 4 Repeat Steps 1 3 using the reject tray or bag for loading, until all denominations are completed. The end result will be a coin bag for each denomination along with a count obtained from each round of counting. WARRANTY RiBao Technology currency products are warranted for a period of one year. Warranty covers parts and labor. Items must be returned to depot for service.
