### PRODUCT DESCRIPTION

Global JM 90B Currency Counting Machine The Global JM 90 Cash Counter and Bill Counter with Money Value Counting capability is an economically priced versatile FRONT and TOP LOADING Money Counter. It is easier to use and MORE user friendly than Rear Loading Bill Counters. A Stack of Bills placed in the 500 bill capacity, Extra Large Feed Hopper, to be counted feeds from the bottom of the Stack into the Counter, allowing the user to continue to add bills to the top of the stack for an efficient continuous count. This Cash Counter and Bill Counter is a Bank Quality Cash Counter that counts and can create batches of bills Size and number of bills chosen by the user. while counting presorted bills or units. This Currency Counter is a good fit for most businesses and personal users, allowing them to enjoy the savings in time and money made possible by automated cash counting. This Cash Counter is perfect for high volume counting where speed and bank quality counting accuracy is necessary. The JM 90 Money Counter has 3 selectable bill counting speeds 900, 1200 and 1600 bills per minute. Slower speeds are very helpful when counting new money Run new money through the machine to break the ink between the bills. , old and worn bills A slower speed can prevent additional damage to bills and minimize the possibility of jamming. and non currency items like labels or coupons. The slower speeds also allow the user to do a visual check on whether the denominations have been correctly sorted. The JM 90 Money Counting Machine comes with a comparatively large, bright, clear, easily readable blue LED display. The user friendly, selectable Value Count feature gives the operator the option of letting the JM 90 money counter calculate the Value of the bills counted by doing the multiplication of the unit count as each presorted denomination is
