PRODUCT DESCRIPTION

Cassida 5520 UV Currency Counter Advanced Cassida counting equipment uses the latest technological advancements available in the industry. All Cassida machines utilize Infra Red technology which maximizes currency counting accuracy as well as half and double note detection Time saving All Cassida counters are equipped with an auto start feature which significantly reduces time in cash processing operations. Machines start batching, counting, or adding automatically the moment bills are placed in the hopper. Reliable An increasing trend in counterfeit money has forced many businesses to search for a way to combat fraud. All Cassida machines feature a built in UV ultraviolet fluorescence detection system to alert you of suspect bills. Operating environments vary greatly, and so do individual needs. Should your business require more protection, models featuring both magnetic and ultraviolet detection are available to protect your bottom line.
