PRODUCT DESCRIPTION

This Item Has Been Discontinued, The Full Current Martin Yale Product Line Can Be Found On This Site Martin Yale 3800FC Form Cutter Slitter Perforator Martin Yale s 3800FC paper cutter cuts, slits, and perforates brochures, checks, coupons, tickets, and computer generated forms. It handles up to 12,000 8.5 x 11 sheets per hour. The 3800FC paper cutting machine s time tested bottom feeding system eliminates the need for fanning and allows for continuous processing. The depth control adjustment compensates for varying paper thickness. Handles paper widths from 3.875 to 18 , paper lengths from 3.5 to 22 , and paper weights from 16 bond to 150 bond. It comes with two 7 tooth perforating wheels and one slitting wheel. FEATURES Includes two standard 7 tooth per inch perforating wheels. Cut, slit, and perforate cut sheet documents. 3 and 10 tooth per inch are also avail. . Perfect for checks, coupons, tickets, and labels. Allowing virtually continuous operation. Time tested bottom feeding eliminates the need for fanning. Setup and training available at additional cost. With FAIM you get Installation by a factory authorized installer Application and use training by a factory installation installer Up to two additional, no charge maintenance calls during the first year by a factory authorized installer Replacement parts free for one year from the date of installation except for consumables such as rubber wheels and rollers; slitting, perforating and scoring wheels; blades, cutting sticks; etc . Why FAIM might make sense for you If you sell consumables, such as paper or forms, you can now sell bursters, decollators, folders and cutters to your customers No need for your organization to develop the servicing skills required to maintain complex machines Allows minimal involvement and frees you to pursue other more profitable or desirable opportunities

Even at an installation where an adjustment might be necessary, factory authorized installers are trained to handle that eventuality. In the unlikely event a machine does not function to the specifications at installation, Martin Yale will repair or replace the unit. Increased customer satisfaction, as there is less room for operator error, an avoidable cause of customer dissatisfaction with equipment. NOTE: The FAIM Program will aid in the proper installation, training and operation of our equipment, however, it is no substitute for proper application selling. Martin Yale warrants its equipment will operate within published specifications, however, specific applications cannot be guaranteed. If an end user has a unique application, simply supply Martin Yale with samples. We will test the application before a buying decision is made.
