PRODUCT DESCRIPTION

Global 500UV MG Fully Automatic Money Value Counter ATTENTION THIS COUNTER HAS BEEN IMPROVED AND IS NOW KNOWN AS THE GLOBAL 1000. IF YOU PURCHASE THE GLOBAL 500, YOU WILL BE SENT THE GLOBAL 1000 AT NO EXTRA CHARGE <https://officeequipmentmachineshop.com/item/42167> The Global 500UV MG Mixed Bill Counter and Currency Discriminator is an Intelligent, user friendly true, Fully Automatic Money Value Counter and Currency Sorter that simply stated tells you the Value or the total of the amount of money that you run through and all you have to do is feed your bills into it. You can put bills into this Counter in a Mixed and non Oriented order. You DO NOT have to pre sort put all the bills of one denomination together e.g. all the 1 Dollar bills together or Orient i.e. face the bills in any set direction e.g. all bills facing front and right side up before you put them into this Intelligent Currency Counter for it to give you a total amount. You do not have to push denomination buttons before counting each denomination. This Counter does the sensing and the thinking. If you handle significant amounts of paper money or cash and Need to quickly verify cash amounts of money you receive; Need to check money already sorted for miss sorts; Need to eliminate human error when counting money; Need to reduce money counting time; Need to eliminate the stress and tedium of counting money; Need to get an accurate verification of cash amounts; then You need the Global 500 Fully Automatic Money Value Counter. You may also want to look at one of our other Fully Automatic Money Value Mixed Bill Counters . As an example you can feed into The Global 500 Fully Automatic Money Value Counter bills in this order and in the following denominations 1, 5, 1, 20, and 5 and the Global 500 will display the total of 32.00 and give you a total value for

| Length: | 10.70 inches |
| Height: | 9.40 inches |

each denomination and the number of bills of each denomination that you put through the Counter. You can put bills into this Counter upside down and or backwards and the Global 500 with advanced technology will give you quick and accurate Value Counting, Batching and Bank Deposit Readying of un sorted banknotes without interruption. This Mixed Bill Counter recognizes all US bills in circulation. During the Mixed Bill Counting Process, counted bills are scanned, read and recognized for counterfeit bill characteristics using ultra violet, and magnetic detection. The Global 500 Money Value Counter includes a Menu driven easy to use Operator Panel and has an optional printer available for reports. Bills of one bill denomination can be separated sorted out or batched during the count process. The Large, Blue Backlit Liquid Crystal Display shows all denominations counted by unit and dollar value including a Grand Total. The Global 500 is a quick, efficient and accurate way to count, sort and batch bill where the denominations are not sorted and are mixed together. Global 500 Currency Counter capable of Value Counting any currency will be built to order. Global 500 Money Value Counters are presently available to count Western Africa Banknotes, Kuwait Dinars, Euros, Swiss Francs, Malaysian Ringgit Banknotes, Australian Dollars, and Japanese Yen. Take advantage of our broad selection of Currency Counters to invest in the one suitable for your needs. All are available with and without Counterfeit Bill Detection and in either 110V and or 220V. Our Manual Money Value Counters require a user to Pre Sort Bills by Denomination. These Currency Counters can give you a Bill Count and you calculate the Money Value. Look at the ERC 10, ERC 30, Ribao BC 100, Ribao BC 110, Ribao BC 300, and Ribao BC 1000, Kobell 8750 and 8760, and Billcon N Series of Currency Counters. Our Semi Automatic Money Value Counters also require a user to Pre Sort Bills by Denomination and the Counter calculates the Money Value. Before each group of Pre Sorted Bills is counted the user pushes a button dedicated to that groups Denomination Value. For example, before counting 5 Bills, the user pushes the 5 Denomination Button. Look at our Global JM 80 series of Currency Counters. Our Fully Automatic Money Value Counters do not require a user to Pre Sort, Pre Orient Bills or Push Denomination Keys to get the Value of the money being counted. These Currency Counters will do that work. The Global 500, ERC SB 1000UV MG and Billcon D551 are Fully Automatic Money Value Counters. Three Counting modes Mixed Counting Counts mixed currency without presorting and gives individual counts and values Mixed Sorting Counts one denomination and stops on any other denomination Piece Counting Standard piece counting Detects and counts all US
