PRODUCT DESCRIPTION

TitanWire L Heavy Duty 2 1 Manual Wire Punch and Binding Machine TitanWire L Heavy Duty 2 1 Manual Wire Punch and Binding Machine, made of sturdy die casted metal rather than flexible sheet metal, the TitanWire L is the most heavy duty, reliable, user friendly, and functional machine in its class. DFG chose to use die casted metal for the base and sides of the housing unit rather than using sheet metal for the punching surface to ensure your machine is solid in all the important places. The TitanWire L uses an encased lubrication system that drastically reduces friction and punch pin wear, which equates to longer machine life for the end user. By encasing the lubrication, you are guaranteed to never have lubrication spots on your punched pages. Utilizing the world s first full disengagement pin design recently copied by other manufacturers , punched paper is free from partial punches, on any size project. The disengagement pin design uses independent coil spring mechanisms on each pull pin that allows the pins to disengage with a crisp snapping action. All TitanWire L punch pins are heat treated and precision ground to tight tolerance. The TitanWire L can punch up to 25 pages or 20lb paper, at a pitch of 2 1. For 3 1 pitch, see the TitanWire 3 1 The TitanWire L has the best wire closer design on the market. It features two tapered steel closing blocks with CloseAssist finish, made in a precision controlled environment. This design assures long lasting wire closing quality, especially compared to competing machines sandpaper or fabric covered sheet metal closer. Two adjustment knobs are standard, to assure even and accurate closing. This is VITAL to consistent closure of elements, no matter whose wire you use. FEATURES SPECIFICATIONS Heavy Duty Electric Punch 28 sheets of paper 20 lbs Full Disengagement Pins ensures a completely

PRODUCT SPECIFICATION

DIMENSIONS

Weight:	32.00 lbs.
Width:	20.00 inches
