### PRODUCT DESCRIPTION

EC2000 Heavy Duty Electric Coil Punch and Electric Binding Machine EC2000 Heavy Duty Electric Coil Punch and Electric Binding Machine is made of sturdy die casted metal rather than flexible sheet metal, the EC2000 is the most heavy duty, reliable, user friendly, and functional machine in its class. This Electric coil machines has die casted metal for the base and sides of the housing unit rather than using sheet metal for the punching surface to ensure your machine is solid in all the important places. The EC2000 uses an encased lubrication system that drastically reduces friction and punch pin wear, which equates to longer machine life for the end user. By encasing the lubrication, you are guaranteed to never have lubrication spots on your punched pages. Our 6 inch coil roller is all the rubber you need. Simply start the coil by hand and then touch it to the rubber roller. Your hands unconsciously will move the book as the coil is wound through the paper. 6 inch rollers are the professional standard. With our specially designed Hi Torque punch motor, torture tested for 3,000,000 cycles, the EC2000 takes coil binding to the next level of convenience and ease. The EC2000 can punch 25 sheets of 20 lb paper with the gentle push on a foot pedal, eliminating the manual punching strain on staff members.
