PRODUCT DESCRIPTION

JM 100D Multi Currency Counterfeit Detector If your business receives two or more currency types, the Ribao JM 100D Counterfeit Detector will be invaluable to your cash management. Designed to verify six different world currencies, the model JM 100D fake bill detector works with currencies of six countries. US Dollars USD , European Union currency EURO , Japanese Yens JPY , Hong Kong Dollars HKD , Great Britain Pounds GBP , Canadian Dollars CAD or South Korean won KRW paper currency can be verified with the JM 100D in 0.5 seconds. The operator is warned of suspicious notes with an audible tone to signify fake bills and the fake is automatically rejected from the unit. The JM 100D looks for many possible faults in each bill using colorized optical image analysis, magnetic mark detection, infrared detection, ultra violet and metal thread detection. Plus, the advanced electronics of the JM 100D recognizes the face value of the banknotes automatically, displaying the result in detailed reporting of total number of notes and amount by denomination on a clear, easy to read display. Best of all, when new notes become available the JM 100D connects to your PC for firmware upgrade. If your business accepts cash on a regular basis, this is a must have tool.
